10/31/69 CRUD edition

Bud is mailing to Paul, insured. The copy he has is an NCR copy, bluish in color. It does not xerox well. I have asked him to send it so Paul can read it earlier than if he waits for me to be able to xerox the ribbon copy, which is the master for offset, if that ever becomes possible. Bud has found a place where I can have the master xeroxed for about $20, but I do not now have even that small sum to spare, and when I xerox, I want to be able to do more than a single copy. I'll need two for copyrighting alone. Meanwhile, my wife is reading and picking up errors, and be f the master is xeroxed, I want to make all the corrections. When I have a xerox copy I'll send it to Paul for him to copy, if he desi When Paul has read it (and Jim and Hal if they will do it fairly promptly, I'd like to send Gary. It can go Special 4th Class Rate- books. I'd like it insured against loss or damage for $50, which i. nominal in cost. For another 35¢, which is not essential, it can g 'Special Handling', which is supposed to carry fourth class mail a first-class. Sometimes it does.

I will welcome any and all suggestions and corrections, but they should be on separate paper, not the typescript.

I may get to posting some of the corrections this weekend, while not then is more reading other things. My wife had about a third of it read with corrections typed for posting on. I'll let you know when there is prospect of Xeroxing. As of now, I have to figure on its costing $100 minimum, for less copies than I should have. Right now this is an impossibility.
